

NGRIP transitions by precession phase

0 degrees = precession minimum; 180 degrees = maximum

NGRIP warming starts (GI)
N=34, $\bar{R}=0.21$, $p=0.224$

NGRIP cooling starts (GS)
N=35, $\bar{R}=0.16$, $p=0.407$

All NGRIP transitions (GI + GS)
N=69, $\bar{R}=0.19$, $p=0.093$
